Tackle.io		Marketplace Architect	https://thetechtribune.com/10-best-tech-startups-in-boise/		Cloud Marketplaces priority for this role (AWS*, Azure, GCP)	Customer satisfaction/retention and enables software companies to streamline information and revenue to potential clients thru Cloud Marketplaces in combination with Sales Reps	1. Customer Satisfaction 2. Paint the art of the possible 3. Operate with integrity 4. Learn and grow TOGETHER	Combining both developing technical skills towards my sales/people driven background and being able to hopefully frame things in a relatable way	Opportunity to combine both my people skills and technical skills seems like an interesting opportunity	Tackle.io enables enterprise software companies to accelerate the use of Cloud Marketplaces like AWS, Azure and Google. Our vision is to transform the way software is bought and sold with a laser focus on helping customers build and drive significant channels of revenue through the Cloud Marketplaces.

We are looking for energetic, consultative, passionate "Marketplace Architects" who can put their combination of customer success and technical skills into action by closely working with ISVs to guide on boarding activities for customers through the listing process by advising customers with best practice guidance for listing, pricing and GTM strategy.

Ideally, you're someone who is passionate about technology and the cloud, but also wants to help guide customers to be successful selling. You have immediate credibility with multiple personas, from partner leaders to technologists at all levels. You love to share your passion with others and exhibit good judgment in selecting opportunities to do so. You want to be a part of a company that is defining a category and you want to be out front leading it. If this sounds like you, we'd like to speak with you. |

| Microbe*** | website: microbeformulas.bamboohr.com to apply email: support@microbeformulas.com Phone number: 8669020977 | Front-end Developer | https://www.glassdoor.com/job-listing/front-end-developer-microbe-formulas-JV_IC112794 5_KO0, 19_KE20,36.htm? jl=40363608 5&utm_campaign=google_jobs_apply&utm_medium =organic | | CORE COMPETENCIES (YOUR SKILLS) • JS / JQuery • CSS / Bootstrap • React.js / React Native (preferred) • Node.js (preferred) • GraphQL • Lives congruent with company core values • Quick study and proactive problem-solving • Enhanced analytical skills • Visionary and strategic thinking • Creative problem solving

If you have the skillset listed above, the desire to make a difference daily with the things you create and are willing to work in an environment that values personal contributions and team success, this may be the right opportunity for you. This position is based in Meridian, ID, and is eligible for healthcare benefits. | KEY RESPONSIBILITIES:

The successful front-end developer will: • Execute on UI/UX for all web properties • Assist in the day-to-day front-end design • Work with marketing to help improve overall web conversions • Ship code in a timely manner while not sacrificing quality • Provide feedback, troubleshoot, debug and create features • Participate in Scrum events, e.g. • Daily Scrum and Sprint Planning • Sprints, Sprint Reviews, and Sprint Retrospectives • Design and engineer responsive, clean, and easy to use interfaces • Assist in full stack tasks and projects when needed | Microbe Formulas' mission is this: Creating solutions that work is what we do. Restoring hope and health is who we are. | Microbe seems to be a company that genuinely looks after their employees and are a competitive group of individuals trying to constantly improve. Additionally, at the same time they are looking for someone with a similar skillset as mine at a position that I am looking for | Our Core Values People First This starts with me. I love myself first so that I can love others as myself. I consider this team a family. I challenge, uplift, and encourage my family. I win when we as a family win, and I always seek a win-win. When I can't find one, I take the high road by leading with love.

Excellence & Integrity I can, I will, I must. I do what I say. I deliberately choose the harder right over the easier wrong. I care not only about what gets done but how it gets done. I give 110% even when no one is watching. I strive to be 1% better every day.

Congruent I live in alignment with my inner voice. I am part of something bigger than myself. I am congruent with the team. Together, we live what we believe. We embrace true detox and align our mind, body, spirit, and environment with our creed. We pursue vibrant wellness daily.

Extreme Ownership We exercise extreme ownership in all that we do by demonstrating belief; checking our egos; working as a team; simplifying the complex; planning, prioritizing, and executing; leading up and down the chain of command; and exhibiting self-discipline.

Intentionally Disruptive We are a band of mavericks constantly innovating, creating, and leaning into the inner call to change the world. We fight for those who don't know how to fight for themselves. We are champions. We control our own destiny by creating the future. | We currently have a need for a front-end developer to assist us in creating an exceptional user experience by developing elegant front-end interfaces for new and existing projects across all platforms, including web, mobile, and native. The successful front-end developer will ensure that these solutions create an improved customer journey.

OUTCOMES

The successful front-end developer will maintain the following outcomes at a high level: Improve overall customer satisfaction and conversion Assist in the engineering work as we transition to a new, more scalable tech stack and assist in the execution timetable Maintain low QA kickback rates and/or test pass percentages Consistently and effectively contribute to sprint work by gaining points, committing time to subtasks, and impacting our burn-down chart |

Able to manage multiple projects at once

Able to confidently schedule and estimate project tasks

Able to research and recommend approaches/solutions

Comfortable with a collaborative review process and

integrating client feedback

Capable of clearly communicating job-specific concepts | WHO WE ARE

A hybrid of strategic know-why and marketing know-how, RUHM (German for "glory/fame") is a full-service digital marketing and PR agency of career artists, strategists, and degreed marketers from various industries who travel Idaho, and the rest of the globe, packaging and promoting great brands. We are a Christian owned, patriotic, pro-police, second amendment supporting, Constitutionalist company. | Ruhm seems like a company that not only is competitive but also very team oriented which definitely seems appealing starting out. Additionally, with the role leaning more towards a marketing aspect that appears to fit a bit of my background in psuchology and knowing how to appeal to the majority of people. | "Ten years ago, real estate marketing was an afterthought. Today, it's the big idea. The rise of digital technology, social media and instant access means properties are visible anywhere at any time and from any device. The need for marketing that connects strategically, emotionally and beautifully is more crucial than ever.

With comprehensive, lifestyle-focused branding and multimedia marketing packages, RUHM is reinventing the way luxury real estate developments are bought and sold." -Ruhm Website | THE PERFECT APPLICANT

You're the MacGyver of web development – using bits and pieces of new web tech to design something not only powerful, cross-platform, and responsive, but ridiculously sleek and richly intuitive, too. "How'd you do that?" seems to be an anthem saluted regularly at your coding throne. You're the type of coder who chuckles when people say "that's impossible" and then effortlessly serves them a cold dish of that-just-happened. Beyond your incredible skill of optimizing speedy sites for mobile, tablet, and desktop, you're a team player at heart and are ready for something more consistent and collaborative. Working with our creative team, you'll be an essential part of the "wow" we receive from all our clients when they see the products we've made. Aren't we lucky to have found you? |
| Kount | support@kount.com ——— https://equifax.myworkdayjobs.com/en-US/External/job/Boise/Software-Engineer---AWS-_J00116321/apply | Software Engineer- AWS | https://kount.com/about/careers/software-engineer-aws | | Minimum Qualifications BS in Computer Science, Engineering, or equivalent experience Strong software engineering and software architecture background in languages such as Go (preferred), Rust, C/C++/C#, or Java Experience building RESTful APIs and/or gRPC within a distributed microservice architecture Excellent communication skills and desire to work in a collaborative team environment Experience implementing Amazon Web Services like Kinesis, IAM, ElastiCache for Redis, Lambda, EKS, Neptune, DynamoDB, or Elasticsearch Preferred Qualifications Experience with relational, graph, and NoSQL databases Experience with OWASP and PCI Data Security | REPORTS TO: Software Engineering Manager

Kount, an Equifax Company, delivers digital fraud prevention and account protection for more than 9,000 leading brands and payment providers. Linked by Kount's award-winning AI, the Identity Trust Global Network analyzes signals from 32 billion annual interactions to personalize experiences across the spectrum of trust — from ensuring frictionless experiences to identifying bad decisions deliver safe payment, account creation, and login events while reducing digital fraud, chargebacks, false positives, and manual reviews.

Kount has an opening for a Front-End Software Engineer in our Boise, Idaho office. | Want to know what it's like to work for Kount? Our team is full of passionate people who believe in our products, in helping our customers, and in improving our communities. Kount is located in the heart of downtown Boise within walking distance of restaurants, retail and the Boise greenbelt. | Kount seems like an interesting opportunity to learn more security side of coding where they will teach that background along the way but is a constantly evolving discipline as is which they strongly support | As a Software Engineer at Kount, you'll join a team of developers migrating our existing fraud detection and prevention systems to the Amazon cloud. Since the techniques and technologies fraudsters use are continuously evolving, you'll encounter and solve interesting problems as you build creative solutions to protect our clients. Working closely with Kount's team of Solution Architects, you'll design, build, and unit test robust, high-throughput, cloud-native components in a microservice architecture. Specifically, you'll leverage Agile and continuous delivery methodologies to build containerized services written in Golang and deployed via GitLab CI to Kubernetes (EKS). You'll research and evaluate new technologies to determine if and how we leverage them, so it's important that you're comfortable learning new concepts quickly. Key Responsibilities Produce maintainable, scalable, and high-quality software solutions Demonstrate subject matter expertise and ownership for your team's services Collaborate with the product team, architects, and others to document features and changes Participate in peer design and code reviews Elevate the performance of colleagues through training, mentoring, and promoting best practices Experiment with technologies and propose solutions to challenges including architects and the IT leadership team Incorporate monitoring, logging, and tracing with DataDog and Snowflake |
| Syndigo | linkdin profile—— phone number: 312.766.4801 | Front-end Software engineer | https://www.linkedin.com/jobs/view/front-end-software-engineer-at-syndigo-2309502119/? utm_campaign =google_jobs_apply&utm_source=google_jobs_apply&utm_medium=organic | | Requirements Professional experience with Angular 1-5 years of professional experience in developing software using relevant technologies Strong knowledge of Javascript, CSS, HTML/XHTML, JSON Strong analytic and problem-solving skills Ability to stretch outside one's comfort zone to achieve team success Exhibit positive mindset in networking with team members | Syndigo's Content Experience Hub (CXH) connects more than 12,000 global brands and 1,750 global retailers and recipients — syndicating core, enhanced and rich media content for more than three million products daily.

CXH was designed to offer more than traditional PIMS and DAMS. CXH combines all the capabilities that allow brands and retailers to provide the best possible product experiences through content creation, validation, enrichment, syndication, and analysis. | At Syndigo, our heritage and our success start with our people. We know that the only way to be the best is to hire the great people and give them the tools and culture to grow and succeed. The belief here is that a good idea is a good idea, no matter the life of the person from whom it comes.

We hire people who want to not just be good at their job but be a part of a collaborative team that does amazing things together. People who bring creative problem-solving, take accountability, and who know when to ask one another for help – those who recognizing that this front end position is more entry level so they there is room to learn a lot more based off how their own processes are. | Syndigo is definitely one of the larger companies I have looked that but having offices all over is definitely appealing and them recognizing that this front end position is more entry level so will be your colleagues at more based off how their own processes are. | About the job Syndigo's engineering team is looking for a front-end software engineer who knows Angular to join the team in our office in Brookfield, WI. This is an individual contributor role that will build & enhance the user interface of Content Experience Hub (CXH). The role will require knowledge of coding best practices and understanding of web frameworks and all browsers. The user interface on which this role will be working is how our clients' access their product data and can use the dashboards to find the areas to troubleshoot & improve data quality.

The role will help ensure the accessibility, aesthetics, performance, and security of the application, and work with other members of the software engineering team to perform integration activities.

Essential Duties And Responsibilities Develop and enhance front end user interface of Syndigo software Be a part of larger development team and interface with Product, Project, DevOps and QA teams Understand requirements, code, and test high-quality web apps Take wireframes from conception to implementation Use Agile and Kanban methodologies for SDLC Maintain work backlog through JIRA Collaborate with team members across multiple geographic locations as well as time zones |
